Genre: Action, Free to Play, Indie
Developer:
L. Stotch
Publisher:
L. Stotch
Release Date: 9 Nov, 2016

b4d347fde0

English,German,Russian

Nice game but useless without mouse wheel ! great artwork I only have trackpad wich stops the game progression. fun while it lasted and nice artwork from Russian artist. amazing,,,,,, A M A Z I N G ost. id recommend to everyone who digs jazzy ambient metal/chipstep with a darker tone. man its a weird genre though. It is like darkest dungeon type game but difficulties is easier.

So if you like party dungeon RPG like darkest dungeon and you want easier game play, you may like this game.

Thanks for making this tiny but nice game to us.. It doesn't let me install... :(You don't need go to Las Vegas if u have this game// j/k...

but it's very good game with a big story and so much thing to win.. EDIT: Changing my review from "Not Recommended" to "Recommended". I decided to Give the game another go after reading the news of updates and It's like a totally different game now. Almost everything I complained about in my original review has been fixed and they even completely revamped the map and it looks great now instead of just a big, flat empty map. There are still some bugs like some equipment won't attach to your vehicle and the only work around I've found for that is to save, quit, and come back in then it will work. There are some strange lines that go through some of the fields that you can fall through and get under the map and also the tunnels at the end of the map you can just drive through and fall right off the map, but they are doing weekly patches to this game which is fantastic and each update is pretty big and I expect those things to be fixed very soon. I will say this game probably should not have come out when it did and obviously needed a few more months of work or at least should have been sold as an early access game and not a full release, but if you have any interest in farming games this is now a pretty good game to pick up.

ORIGINAL REVIEW.

Absolutely awful. In the past year I have discovered the Farming Simulator games and fell in love with them. So once I heard about this game I was pretty interested. I bought it and refunded it within an hour. It's horrible. Best way I can describe it is, it feels like it's still in the pre alpha stage of development or a \$5 android game. The textures won't load in until your about 5 feet away from what you're looking at, if you let go of the accelerator when driving no matter how fast you are going you instantly stop, the sounds of the tractors are like a dying vacuum cleaner, the turning radius on all vehicles is terrible, nothing will steer as far as you need it to go, everything looks like it's gliding off the ground, and I can go on and on with the problems this game has but I won't. Instead I'll just say this, for \$40 the developers are out of their mind and have a lot of guts selling something like this that is this bad. If you haven't played a farming game before just go buy Farming Simulator 17 or if you already have it and are looking for something else, Look into Pure Farming 18. It's not out yet at the time of this review but it should be soon and looks like a good contender for farming games.

This game could be really wholesome and relaxing. Sadly, it's just unnerving and frustrating because it has one of the worst controls I ever encountered.. The game is awesome and I can't wait to buy the next episode there are somethings they need to fix and the story is awesome too!. if constant errors and crashes is your thing then try this game... I love this demo. I see how it is easy to get motion sickness from. Just take your time and look straight when you're moving. I really want a Deus Ex VR game. The NPC models at the end are amazing.

I'm currently playing Deus Ex Mankind Divided and this demo really brought the universe to life for me.. was not actually interactive just clicked through riddles.... I would love to recommend this. IF IT BLOODY WORKED!
